Subject: Seismic Study evidence for the record

Mr. Buckshi;

For the record:

RE: Conscientious objections to further seismic study on the Central Coast

PG&E sent a letter to the Coastal Commission requesting PG&E's permit be *expedited*.
PG&E has used the leverage that it may have to raise rates.

Attached: KSBY PG&E rate threat.wmv (video)

It is important to note that this request came just prior to the Californian Coastal Commission closing public comment, and prior to the County of San Luis Obispo taking public comment on an agenda item on the Seismic Study.
