Re: Sewage Sludge Application on County Agricultural Lands

The Terra Foundation supports the recommendation of the Health Agency Director, Public Health Administrator and Director of the Environmental Health Division of the Public Health Department included in their Staff Report first dated 1-29-13:

OPTION 1: Extend the existing Land Application of Treated Sewage Sludge/Biosolids Interim Ordinance until March 2017.

Extending the current Interim Moratorium sewage sludge land application ordinance, which allows an historical amount of the activity, is more protective of agricultural, economic, environmental and financial viability than the two other options.

Thank you.
