

FINDINGS - EXHIBIT A
SUB2013-00010 (CO 13-0048) – PEDP, Inc.

Environmental Determination

- A. The Environmental Coordinator found that the previously adopted Mitigated Negative Declaration is adequate for the purposes of compliance with CEQA. Per State CEQA Guidelines (Sec. 15164(a), Sec. 15162) an Addendum to the adopted Mitigated Negative Declaration was prepared as the following conditions apply: 1) only minor technical changes or additions are necessary; 2) no substantial changes have been made or occurred that would require major revisions to the Mitigated Negative Declaration due to either new significant effects or substantial increases in the severity of previously identified significant effects; 3) substantial changes have not occurred with respect to the circumstances under which the project is undertaken; 4) no new information of substantial importance which was not known or could not have been known at the time of the adopted Mitigated Negative Declaration has been identified. No new mitigation measures have been proposed.

Tentative Map

- B. The proposed map is consistent with applicable county general and specific plans because it complies with applicable area plan standards and is being subdivided in a consistent manner with the Commercial Service land use category.
- C. The proposed map is consistent with the county zoning and subdivision ordinances because the parcels meet the minimum parcel size set by the Land Use Ordinance and the design standards of the Real Property Division Ordinance.
- D. The design and improvement of the proposed subdivision are consistent with the applicable county general and specific plans because required improvements will be completed consistent with county ordinance and conditions of approval and the design of the parcels meets applicable policies of the general plan and ordinances.
- E. The site is physically suitable for the type of development proposed because the proposed parcels contain adequate area for development of commercial service uses allowable by San Luis Obispo planning area standards.
- F. The site is physically suitable for the proposed density of the development proposed because the site can adequately support commercial service uses allowed by San Luis Obispo planning area standards.
- G. The design of the subdivision or the proposed improvements will not cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat because the project is located in a predominately developed area with no significant fish or wildlife habitat in the immediate vicinity of the project site. The Mitigated Negative Declaration developed for the original subdivision (Tract 2368) contains adequate mitigation measures to avoid significant environmental impacts.
- H. The design of the subdivision or the type of improvement will not conflict with easements acquired by the public at large for access through or use of property within the proposed subdivision.

Attachment 1

- I. The proposed map complies with Section 66474.6 of the State Subdivision Map Act, as to methods of handling and discharge of waste.
