Hello,

My name is Mike McCluskey and I am the owner of the home at 148 San Luis Street which is within the proposed utility District.

I am in full support of this project as I feel these overhead line are a safety hazard for the area it services. In my case high voltage line pass directly along my property line to feed houses on other lots which are more set back from the street and thus these lines pass overhead in areas where we frequently sit. In a worse case scenario of an earthquake there could be a strong likelihood that someone could be seriously injured on my property either by high voltage or falling services.

if you need any further support please let me know and feel free to call me at 805-441-4617.

I cannot attend the hearing but thought important to voive my and my wife's support of the proposed utility change.

Sincerely,
Mike McCluskey
