County of San Luis Obispo

TO: Board of Supervisors

FROM: Administrative Office / Lisa Howe/781-5011

DATE: 4/21/2015

SUBJECT: Thirty-day update on current drought conditions and related management actions for the Board's review of the continuing need for the March 11, 2014 proclamation of local emergency pursuant to Government Code section 8630. All Districts.

RECOMMENDATION

It is recommended that the Board receive the thirty-day update on current drought conditions and related management actions establishing the need to continue the proclamation of local emergency due to drought conditions in San Luis Obispo County.

DISCUSSION

Background

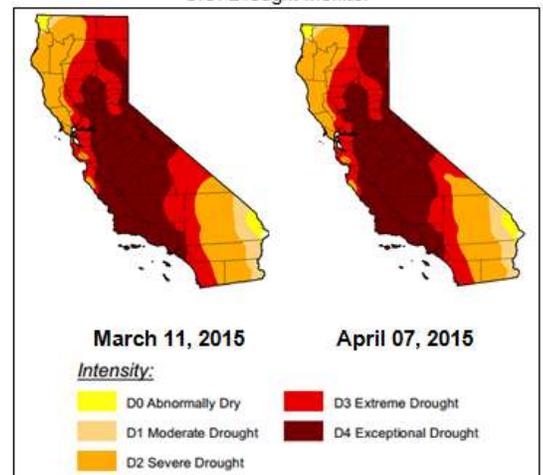

On March 11, 2014, the Board adopted a resolution proclaiming a local emergency due to drought conditions in San Luis Obispo County. Section 8630 of the California Government Code and County Code Chapter 2.80.070 (2) require that the Board of Supervisors review the need for continuing the local emergency at least every 30 days until such emergency is terminated. The Board also directed staff to return every 30 days to provide an update on the status of actions by the Drought Task Force, including a report on the analysis regarding local water conditions, local responses, conservation and outreach projects, and the State Water Project.

The last drought update was on March 24, 2015. This is the sixteenth update since the proclamation of a local emergency on March 11, 2014. The Drought Task Force continues to meet regularly to coordinate drought monitoring, impact assessments, responses to emergency health and safety, and public communication and outreach. The Drought Task Force prepared the Monthly Drought Update (Attachment 1) to inform the Board on current drought conditions and related management actions. Current drought conditions confirm the need to continue the proclamation of a local emergency.

Current Conditions

With April snow measured at its lowest level on record, California is entering its fourth year of severe drought. Statewide snowpack remains at 5% of normal as of April 6, 2015. Precipitation throughout the State continues to be well below what would be typical for this time of year. Much of the State remains in a severe drought or worse. The latest U.S. Drought Monitor report released April 9, 2015, indicates San Luis Obispo County remains at the D4 – Exceptional Drought intensity rating (Attachment 2). Approximately 93% of California is at a level D2 Severe Drought or worse with 44% of the State at a D4 intensity level. Continued dryness resulted in an expansion of Exceptional Drought (D4) in northwest California. Figure 1 shows how the intensity levels throughout the State have changed over the past month.

Figure 1
U.S. Drought Monitor

County rainfall totals for the 2014-15 water year (July 2014 – June 2015) range from 39-64% of average annual rainfall totals. See Attachment 3 for additional information. Reservoir levels remain significantly lower than the average percentage capacity for this time of year including: Nacimiento 29% (108,275 acre feet); Whale Rock 43% (16,873 acre feet); Lopez 39% (19,293); and Salinas 17% (4,021 acre feet) of capacity (Attachment 4).

Outlook

California, the central coast in particular, remains the driest region in the western half of the U.S. over the past 3 years. The National Weather Service's Climate Prediction Center has issued an El Niño Advisory for a 50-60% chance of a weak strength event through summer. Due to the expected weak strength, widespread or significant impacts are not anticipated. The U.S. Seasonal Drought Outlook is calling for the drought to persist or intensify throughout California. (Attachment 5).

Impacts

Agricultural Conditions

Crop statistics for preparation of the Agricultural Commissioner's 2014 Annual Crop Report have been compiled and analyzed. Several survey methods were used to ask hundreds of agricultural producers for data concerning acreage in production, yields and production data, trends and challenges they faced in 2014. The overall value for 2014 for all agricultural sectors was \$902,991,000, a decrease of nearly 2% compared to 2013 revised figures. This decrease reflects the negative impacts and challenges producers faced in 2014 due to the severe, ongoing drought. The Monthly Drought Update (Attachment 1) includes a summary of the data and trends by industry type.

Fire Conditions

Due to recent dry weather, the fire hazard will significantly increase through the upcoming fire season. Longer days and warm and dry weather has steadily increased the fire danger and moved up the start of the 2015 fire season, which is now set for April 13, 2015. Widespread tree mortality is plainly evident throughout the County increasing fire danger. CAL FIRE continues to monitor the drought situation and prepare for the wildfire season ahead while maintaining staffing that meets the current threat.

As a result of the recent attention to the severe fire threat to and in the Cambria area, there has been mention in various venues of requesting the Board of Supervisors to proclaim a separate local emergency due to the fire threat and related concerns. However, included in the proclamation of local emergency for the drought is reference to fire conditions and water supplies being threatened in a number of communities as it relates to firefighting needs. Thus, the current proclamation includes acknowledgement of the fire threat throughout the county and already covers any issues that may need to be using the authority of a local proclamation.

Domestic Wells

The County continues to receive calls from individuals who are experiencing problems with their domestic wells; however, determining how many wells have gone dry is proving to be challenging. State agencies are reporting this is a problem statewide.

The Governor's Drought Task Force created an online intake form for use by local, state, or tribal and Federal agencies to document domestic water issues. Data collected is considered confidential and access is restricted. Individuals with domestic water issues are encouraged to contact County Environmental Health at (805) 781-5544.

In addition, the County Drought Task Force created a supplemental anonymous survey. The survey does not ask for any identifying information and is intended to support our request for federal disaster assistance for individuals. Individuals who wish to remain anonymous are encouraged to complete the supplemental survey online at www.slocounty.ca.gov/admin/Drought_Update or by phone by calling (805) 781-5011.

To date, the County has received 91 responses to the supplemental survey. Of the 91 respondents, 29 (35%) report that one or more wells have gone dry, 12 (14%) are trucking in water, and 66 (79%) have heard of other wells running dry in their area. It is important to note that the survey is voluntary and as a result, responses are not representative of the county population.

Economic Conditions

Negative economic impacts continue to mount due to drought conditions. The San Luis Obispo County Workforce

Investment Board (WIB) continues to gather information on local drought-related job impacts. The WIB's Drought Business Impact survey is available at <http://sloworkforce.com/drought-survey/>. Though the WIB is hearing that there are impacts, the County does not have any "reportable" impacts due to the State's requirements for reporting (i.e. specific business name, address, etc.).

The County continues to identify assistance programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions. Information regarding drought assistance for rural homeowners has been placed on the County Drought Conditions and Water Conservation webpage. Rural Development, an agency of the United States Department of Agriculture (USDA), delivers a number of programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions.

Emergency Response Planning

County Office of Emergency Services

San Luis Obispo County OES continues to coordinate with the Governor's Office of Emergency Services (Cal OES) to provide updates on the drought situation, respond to specific information requests to Cal OES, and coordinate local emergency needs. In addition, County OES continues to gather local situation status information and drought costs throughout the county in order to send the information to Cal OES.

Additionally, information specific to the Cambria fire threat has been provided to Cal OES and has been shared with the State Drought Task Force. The status of the Cambria fire threat has and will continue to be well a high priority issue shared with state agencies

Contingency Planning

The Public Health Department, the Public Works Department, and CAL FIRE/County Fire continue to develop plans to ensure there is adequate supply of water for firefighting and domestic water use in the event that a community does not have enough water. Water availability information from public water systems has been categorized into three categories; Watch, Vulnerable, and Critical. The information has been placed into a GIS mapping layer for contingency planning.

Emergency Actions

The proclamation continues to provide authority for unforeseen needed actions. As also noted, proclamation provides a statement to State and Federal agencies of the seriousness of the County's situation.

The County has taken no new emergency actions specific to the drought in this reporting period.

Mandatory Water Reductions

On April 1, with April snow measured at its lowest level on record, Governor Edmund G. Brown Jr. issued an Executive Order directing the State Water Resources Control Board to implement mandatory water reductions in cities and towns across California to reduce water usage by 25 percent through February 2016 (Attachment 6). The Executive Order stipulates the 25% reduction in water use as compared to 2013. This savings amounts to approximately 1.3 million acre-feet of water over the next nine months, or nearly as much water as is currently in Lake Oroville. To achieve these savings, the State Water Board is expediting emergency regulations to set usage targets for communities around the State. The proposed schedule is as follows:

- | | |
|--|-------------------------|
| • Governor issues Drought Executive Order | April 1, 2015 |
| • Notice announcing release of draft regulatory framework and request for public comment | April 7, 2015 |
| • Notice announcing release of draft regulation for informal public comment | April 17, 2015 |
| • Emergency rulemaking formal notice | April 28, 2015 |
| • Board hearing and adoption | May 5 or 6, 2015 |

The proposed regulatory framework for emergency rulemaking and the proposal for urban water supplier usage tiers can be found on the State Water Resources Control Board website at http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_mandatory_regulations.shtml

County staff is currently evaluating the governor's Executive Order and participating in conference calls with Water Board officials to review implementation.

Recommendation

Staff recommends that the Board review and receive the attached update. The update highlights the existence of continuing drought conditions in San Luis Obispo County. Review of this update by the Board fulfills the Board's duty to review the need to continue the proclamation of a local emergency due to the existence of drought conditions pursuant to Government Code section 8630. No other Board action is necessary.

Note: Any regulations issued because of the local drought emergency would be subject to Board approval. The local emergency proclamation adopted by the Board on March 11, 2014, will remain in effect until terminated by your Board.

OTHER AGENCY INVOLVEMENT/IMPACT

At the onset of the Governor's declaration and under the direction of the County Administrative Officer, a County Drought Task Force was formed. The Drought Task Force is comprised of multiple County departments, including: the Administrative Office, Office of Emergency Services, Public Works Department, General Services, County Parks, County Fire (CAL FIRE), Agricultural Commissioner, Planning and Building, Farm Advisor, Health Agency, and County Counsel. All member departments provided input for this report.

County OES continues to be in regular contact with Cal OES to receive and provide situation status information.

The Public Works Department continues to coordinate with local water purveyors and cities.

Public Health is coordinating with relevant State agencies, including the State California Department of Public Health and Emergency Medical Services Authority Health Coordination Center.

FINANCIAL CONSIDERATIONS

The long-term financial impact on the local economy, including the demand on County and other legal agency services, cannot be forecast at this time. The County continues to track drought-related costs. As of April 9, 2015, tracked labor costs associated with the drought total \$326,733.

RESULTS

Accepting the update prepared by the Drought Task Force, which establishes the existence of conditions of drought, confirms the need to continue the proclamation of a local emergency. Maintaining the proclamation of local emergency will continue to allow for the Public Works Department and other agencies to take immediate actions needed by allowing temporary reduction of certain regulatory and purchasing requirements. This will also permit County staff to assist in drought-related work and tasks outside their normal scope of duties in the capacity of Disaster Service Workers under Government Code section 3100. In addition, acceptance of the update from the Drought Task Force confirms the continuing existence of severe drought conditions and will also serve as notice to the State of our dire conditions and a reminder to all of the serious drought conditions facing the County and State.
