

**EXHIBIT A – FINDINGS**  
**DRC2015-00010 / Verizon Wireless**

***CEQA Exemption***

- A. The project qualifies for a Categorical Exemption (Class 3) pursuant to CEQA Guidelines Section 15303 because the co-location and construction of the wireless facility is minor in nature, involves little site disturbance, will not require the removal of any native vegetation, and will visually blend with the existing PG&E wooden power pole.

***Minor Use Permit***

- B. The proposed project or use is consistent with the San Luis Obispo County General Plan because the use is an allowed use and as conditioned is consistent with all of the General Plan policies.
- C. As conditioned, the proposed project or use satisfies all applicable provisions of Title 23 of the County Code.
- D. The establishment and subsequent operation or conduct of the use will not, because of the circumstances and conditions applied in the particular case, be detrimental to the health, safety or welfare of the general public or persons residing or working in the neighborhood of the use, or be detrimental or injurious to property or improvements in the vicinity of the use because the because the installation and operation of such a facility does not generate activity that presents a potential threat to the surrounding property and buildings. This project is subject to Ordinance and Building Code requirements designed to address health, safety and welfare concerns.
- E. The proposed project or use will not be inconsistent with the character of the immediate neighborhood or contrary to its orderly development because the wireless communication facility will blend with the existing PG&E wooden power pole, and will not conflict with, the surrounding lands and uses.
- F. The proposed project or use will not generate a volume of traffic beyond the safe capacity of all roads providing access to the project, either existing or to be improved with the project because the project is located on Pineridge Drive, a local road constructed to a level able to handle any additional traffic associated with the project

***Coastal Access***

- G. The proposed use is in conformity with the public access and recreation policies of Chapter 3 of the California Coastal Act, because the project is not adjacent to the coast and the project will not inhibit access to the coastal waters and recreation areas.

***Sensitive Resource Area***

- H. The project or use will not create significant adverse effects on the natural features of the site or vicinity that were the basis for the Sensitive Resource Area designation, and will preserve and protect such features through the site design, because no trees will be removed for the project.
- I. As designed, natural features and topography have been considered in the design and siting of all proposed physical improvements.

## ATTACHMENT 1

- J. The proposed clearing of topsoil is the minimum necessary to achieve safe and convenient access and siting of proposed structures, and will not create significant adverse effects on the identified sensitive resource.
- K. The soil and subsoil conditions are suitable for any proposed excavation and site preparation, and drainage improvements have been designed to prevent soil erosion and sedimentation of streams through undue surface runoff. To ensure compliance, the project has been conditioned to submit a drainage plan to Public Works at time of application for building permits.

### ***Environmentally Sensitive Habitat***

- L. There will be no significant negative impact on the identified sensitive habitat, and the proposed use will be consistent with the biological continuance of the habitat as the project has been designed to avoid impacts to the maximum extent feasible. The project does not require the removal of native trees or vegetation.
- M. The proposed use will not significantly disrupt the habitat, as the property is located within an existing urban developed neighborhood.
