

EXHIBIT C - FINDINGS
Minor Use Permit DRC2014-00060 (Kendall Road LLC)

Environmental Determination

- A. The Environmental Coordinator found that the previously adopted Negative Declaration is adequate for the purposes of compliance with CEQA because: 1) no substantial changes are proposed in the project which would require major revision of the previous Negative Declaration, 2) no substantial changes occur with respect to the circumstance under which the project is undertaken which will require major revision of the previous Negative Declaration, and 3) no new information of substantial importance has been identified which was not known at the time that the previous Negative Declaration was adopted.

Minor Use Permit

- B. The proposed project or use is consistent with the San Luis Obispo County General Plan because the proposed offices and warehouses are allowed uses and as conditioned are consistent with all of the General Plan policies.
- C. As conditioned, the proposed project or use satisfies all applicable provisions of Title 22 of the County Code.
- D. The establishment and subsequent operation or conduct of the use will not, because of the circumstances and conditions applied in the particular case, be detrimental to the health, safety or welfare of the general public or persons residing or working in the neighborhood of the use, or be detrimental or injurious to property or improvements in the vicinity of the use because the proposed offices and warehouses do not generate activity that presents a potential threat to the surrounding property and buildings. This project is subject to Ordinance and Building Code requirements designed to address health, safety and welfare concerns.
- E. The proposed project or use will not be inconsistent with the character of the immediate neighborhood or contrary to its orderly development because the offices and warehouses are similar to, and will not conflict with, the surrounding lands and uses because the project has been designed to minimize impacts.
- F. The proposed project or use will not generate a volume of traffic beyond the safe capacity of all roads providing access to the project, either existing or to be improved with the project because the project is located on Kendall Road, a local road constructed to a level able to handle any additional traffic associated with the project. In addition, traffic from the project will access onto Highway 227, a state highway. Traffic impacts from this project were part of the environmental review for Tract 2368. Based on that review, no significant traffic impacts from the current project are anticipated and no additional mitigation measures or improvements are needed.
