September 3, 2015

David Church, Executive Director
San Luis Obispo Local Agency Formation Commission
1042 Pacific Street, Suite A
San Luis Obispo, CA 93401

Dear Mr. Church:

As a part of forming a district to manage groundwater in the main Paso Robles Groundwater Basin, it is necessary to determine the properties that are to be included in the district area. The Local Agency Formation Commission (LAFCO) has proposed to establish the District boundary based on the basin boundary as presented in on Figure 2 of the 2002 Paso Robles Groundwater Basin Study exclusive of the Atascadero Subbasin, located southwest of the Rinconada fault.

In establishing this boundary, LAFCO recognizes that some parcels may be in areas where there is some question as to whether the parcel is, or is not, within the boundary. Therefore, a Request for Exclusion form has been made available to those property owners that question the inclusion of their parcels within the District. Cleath-Harris Geologists (CHG) has been directed to review these Requests for Exclusion and determine if the parcels presented have any portion of their parcels within the basin boundary and, as a result, could be determined to be “included”, or if the parcels are fully outside of the basin boundary and, as a result, could be determined to be excluded.

Requests for Exclusion forms were filed with LAFCO for 547 parcels. Cleath-Harris Geologists has reviewed these “Requests for Exclusion”. The exclusion requests were provided to CHG in hard copy and also on a GIS platform that identified the parcels and pertinent information on a map of the basin area.

BASIN BOUNDARY DEFINITION

The basin boundary shown on Figure 2 in the 2002 Paso Robles Groundwater Basin Study report was presented on an 11” x 17” sheet with a scale of 1” = 30,000’. At this scale, the line width was approximately 500 feet. EGI, a consultant to the County of San Luis Obispo Planning Department, converted this line to a GIS shape file that selected the middle of this line as the boundary with much finer definition. This basin boundary line is shown on the Planning Department on-line maps. While this finer definition provides a narrower boundary line, it could be argued that it includes more (or less) area within the basin than does the map in the 2002 report. For the purposes of this exclusion evaluation, the inside of the line shown on Figure 2 was used to be the dividing boundary that would establish whether or not the parcel is inside the basin.

The boundary that separates the Atascadero Subbasin from the Paso Robles Main Subbasin (the area to be included in the District) is along the Rinconada fault alignment as shown on Figure 2 of the Paso Robles Groundwater Basin Study report.

PARCEL DETERMINATIONS

The property boundaries for each parcel included in the Requests for Exclusion were overlaid on a map with the basin boundary. The determination of inclusion or exclusion was based on whether any part of the parcel is inside the main basin boundary line from the 2002 report.

The parcels and their determinations are presented in Table 1.

Very truly yours,

CLEATH-HARRIS GEOLOGISTS

A handwritten signature in blue ink that reads "Timothy S. Cleath". The signature is fluid and cursive.

Timothy S. Cleath, Certified Hydrogeologist #81

MEMORANDUM

TO: LAFCO Commissioners

FROM: Mike Prater, Sr. Analyst

RE: Supplemental Information for September 17, 2015 Hearing

DATE: September 14, 2015

Commissioners,

Please find the attached additional information submitted after the staff report was published on September 10, 2015 and the date of this memo.

Of particular attention is a letter from our consultants Cleath-Harris Geologist Inc. that addresses the Requests for Exclusion documentation that was presented by individuals. In addition, two more requests for exclusion are included that fall within the basin boundary.

Also included are a letter from San Miguel Community Services District President and a Board Member, additional comments from concerned citizens, and letters of support from landowners.

SUPPLEMENT TO ATTACHMENT D

CLEATH-HARRIS EXCLUSION REPORT

- **CLEATH-HARRIS MEMO**
- **EXCLUSION REQUESTS**

Cleath-Harris Geologists, Inc.
71 Zaca Lane, Suite 140
San Luis Obispo, CA 93401

September 10, 2015

David Church, Executive Director
San Luis Obispo Local Agency Formation Commission
1042 Pacific Street, Suite A
San Luis Obispo, CA 93401

**Subject: Geologic Basis for Exclusion from Paso Robles
Groundwater Basin Management District: follow up to 9/3/2015 letter**

Dear Mr. Church:

As a part of forming a district to manage groundwater in the main Paso Robles Groundwater Basin, it is necessary to determine the properties that are to be included in the district area. One of the provisions in the Local Agency Formation Commission's 'Request for Exclusion' is that a property owner may request exclusion based on "Geologic data (well logs, studies, other) that indicates that you are outside one of those Boundaries mentioned above (please provide documentation)". Several property owners have provided documentation and a rationale for exclusion where it has been determined that the parcels are within the basin boundary.

Cleath-Harris Geologists has reviewed this information and provides a discussion regarding the significance of the information with respect to inclusion/exclusion of the specific parcels in the Paso Robles Groundwater Basin.

Estrella Ranch, LP provides well information and watershed maps and refers to a private study of Shandon Valley Water (which was not provided). The exclusion request maintains that "a separate shallower aquifer exists above 240 feet MSL" and that this separate aquifer "does not contribute to other subareas". Therefore, they argue that it should be excluded from the management district and have its own management. It is not possible to fully evaluate this geologic basis for the proposed exclusion without reviewing the basis for it (the Shandon Valley Water study). However, in general terms, groundwater basins are comprised of multiple aquifers that store and transmit water to each other. Excluding vertically limited portions of the basin from the management district on the basis of there being a three-dimensional boundary between shallower and deeper groundwater flow systems is potentially possible but, if proposed, it is not likely that this boundary could be established at a set horizontal datum. The hydrogeologic cross section included in their submittal provides a two dimensional representation of the aquifers and is not sufficient to establish a boundary condition.

9/10/2015

APN 019-151-013

This exclusion states that “The Green River Mutual Water District does its own management! It doesn’t belong in the Paso Basin District! All its wells draw from the Estrella River underground?” The groundwater basin includes the alluvial deposits of the Estrella River that transmit the underflow of the Estrella River (the Estrella River underground). Therefore, it is within the boundary of the Paso Robles Groundwater Basin.

APN 019-011-042

This exclusion request states that “two fault blocks likewise exist south of the ends of Hog Canyon and Ranchita Canyon extending westerly toward San Miguel. It is our further understanding that the same conditions exist between Ranchita Canyon and the proposed Paso Robles Groundwater Basin as that in Atascadero.” There are many faults within the Paso Robles Groundwater Basin. The geologic maps of the area used in the 2002 Report do not show faults in this area, nor does the 2004 Geologic Map of the Estrella & Shandon Quadrangles by Thomas W. Dibblee Jr.. A map prepared by the U.S. Geological Survey for an interferometry analysis that evaluated subsidence does interpret that some faults to be present in the Estrella River area. There is not enough information provided by the requester nor available from published reports and maps to substantiate the presence of faults that offset and separate groundwater bearing aquifers in this area.

APN 071-011-001

This exclusion request notes that this 167 acre parcel is entirely outside the Bulletin 118 line and that the portion of the area within the basin boundary line is “a rocky ridge running east and west. The sole water supply for this grazing land is Fernandez Spring, the elevation of which is well above any groundwater levels in our area. So, the water supply for this area is not from the Paso Robles groundwater basin, it does not appear that the land would lend itself to a groundwater well and there is no reason to try to access groundwater here.” The information is too general to show clear evidence that could exclude the parcel on the basis of geology. Additional geologic and water level information could be provided to consider this request.

APN 043-311-021 and 043-311-020

The request notes that “The parcel (043-311-020) has steep slope with surface shale rock ledges visible. There have been oil wells drilled in the 1940’s which have hit sulfur water in the shale formations.” Shale rock outcrops are definitely not the type of rocks included in the basin. The request, however, does not clearly establish the absence of Paso Robles Formation sediments over the entire area of the parcel. Parcel 043-311-021 is recognized

in the Request for Exclusion as being partially within the Basin. This confirms that the parcel should be included within the Basin.

APNs 017-251-070, 017-251-071, 017-251-072, 037-301-002, 037-301-003, 037-301-008, 037-301-012 (Shandon area)

This exclusion request is for properties south of Shandon and east of the San Juan River. The GSI report, 'Hydrogeologic Evidence that Supports Differential Groundwater Management Approaches within the Paso Robles Basin' signed by Bryan Todd Bondy P.G. is provided with this request. Therefore, while their conclusion that within the basin 'differential groundwater management approaches are justified' suggests internal management boundaries, it does not state that the Shandon area is outside of the boundaries of the Paso Robles Groundwater Basin. These parcels are included within the Basin Boundary.

Parcels within the area between Mustard Spring Road and West of the Salinas River: parcels 018-041-023, 018-021-007, 018-021-009, 018-021-010, 018-011-027, 018-022-012, 018-022-002, 018-251-025, 024-271-026, 018-041-022, 018-041-024, 018-041-015, 018-031-023,

Gary Philbrick, Associate Oil and Gas Engineer-Retired states that the geologic unit underlying this area is the Monterey Formation and is isolated from the PRGWB by a fault. He notes that the water quality is very different in this area (high levels of Total Dissolved Solids, boron, and hydrogen sulfide. He also notes that there is warm water in the area and that there is artesian flow in wells due to the upwelling of warm water through faulting fractured Monterey Formation. He infers that groundwater in this area is **hydraulically isolated from the main basin**. The well logs provided all describe the drilling cuttings as 'shale gravel', not shale. Shale gravel is found commonly in Paso Robles Formation aquifers. If the rock encountered was shale and not shale gravel, it would be simple to say that the area is outside of the basin.

However, this area is one which should be reviewed further. The poor water quality, the artesian flow from wells (probably gas driven), the high water levels, the presence of warm water between this area and the main basin area, the mapping of a fault between this area and the Salinas River, are good evidence that this area might be hydraulically separate from the groundwater basin.

CONCLUSION

CHG has reviewed various parcels with geologic evidence presented. The Mustard Springs area warrants further consideration for exclusion from the PRGWB. Additional evidence could be helpful in one or two other parcels as identified above.

Very truly yours,

CLEATH-HARRIS GEOLOGISTS

Timothy S. Cleath, Certified Hydrogeologist #81

SEP 10 2015

To Donna Bloyd,

On the notification sent for the public hearing for August 20, nothing was mentioned about a deadline to request to be placed out of the water district. I do not believe that the County has approved any boundaries thus far. I requested by email just by luck before the 28th for the form but you did not email the information. We finally called and you mailed us the information but sent September 2nd. We did what we could before the deadline.

Neighbors have spoken saying that non-irrigated ground east of San Juan Road should be removed from the proposed district. The FUGRO line drawn in Gillis Canyon is arbitrary and includes many neighbors who are not in the aquifer. By picking which neighbor should or should not be in the district is totally arbitrary and unfair. Gillis Canyon should be totally out of the district to be fair.

We do not have PGE, power, on our land and neither does our neighbor Flint Spears. Not having power is not a choice but because it would cost over \$150,000 to bring a power line to our property as well as our neighbor's property. This has been a problem for borrowing money from a commercial bank. Our property which includes our neighbors in the canyon has steep, steep, sagebrush land that will not allow for any irrigation.

I am for Agriculture and do believe the aquifer should be used by Agriculture within reason, but the neighbors who are making a lot of money by using vast amounts of the water by irrigating huge acreages, for example our multi-national neighbor on the San Juan Road, Harvard University's Pension Trust, should be the ones in the district...the large water users.

52% of the people who own land in the proposed water district do not live in our County, and yet they can vote by proxy. I do not believe that people who do not live in this County care about our interest.

In the proposed district how many acres you have decides who will be on the board. I think it is ridiculous that people who have over 400 acres have the right to hold two positions on the board. At the same time people who have over 400 acres can run for smaller land categories. This does not sound like local control for me.

I request that Gillis Canyon which includes our parcel be removed from the district. Since we are on the edge of the FUGRO boundary, and we did contact you before the 28th deadline but you, and we do not know why, did not email the information in time, will give us fair consideration.

Thank-you, Coralie McMillan

Exclusion Request Form

1. **Instructions.** This form may be used to request exclusion from the Paso Robles Basin Water District. A submitted request for exclusion does not guarantee approval. The San Luis Obispo Local Agency Formation Commission has discretion and makes the final decision with regard to the boundaries of the District. The new State Law-Sustainable Groundwater Management Act (SGMA)-requires management of groundwater resources in the Paso Robles Groundwater Basin. If formed, the proposed District would be required to comply with SGMA. Exclusion property requests that are within or touch the Fugro Boundary are unlikely to be recommended for approval because the State Law requires management of the water resources and using the Fugro Study provides a geologic basis for the location of the basin boundary.

2. **Criteria.** The following criteria will be used to evaluate a request:
 - a. Location of the property in respect to the boundary of the Paso Robles groundwater basin as described by the Fugro Study and DWRs Bulletin 118 and compliance with SGMA.
 - b. Geologic data (well logs, studies, other) that indicates you are outside one of those Boundaries mentioned above. (please attach documentation)
 - c. Reasons for the exclusion request. A request that does not provide an adequate and documented basis is likely to be rejected.
 - d. Does the exclusion request create a boundary that is illogical or difficult to serve.

3. Please provide the name, address, and APN of the land owner.

Name: Coralie McMillan

Address: P.O. Box 435
Shandon, Ca. 93461

RE: EXCLUSION REQUEST
PARCEL NUMBER: 017-271-033

DEAR PEOPLE,

I HAVE BEEN MADE AWARE (TODAY) BY A NEIGHBOR LAND OWNER, THAT MY PROPERTY MAY BE IN THE (APPARENTLY) NEW BOUNDARIES OF YOUR JURISDICTION.

AT THE ONSET OF ALLOF THIS WATER DISTRICT SITUATION, WE LOOKED ON THE BOUNDARIES INDICATED IN THE TELEGRAM TRIBUNE. IT APPEARED THAT WE WERE NOT INVOLVED. TO BE SURE, WE CALLED THE SLO COUNTY PLANNING DEPT. WHO LOOKED ON THE THEN EXISTING MAP AND TOLD US THAT WE WERE JUST ON THE OUTSIDE OF IT. OUR NEIGHBOR APPEARED TO BE INSIDE, BUT THEY WEREN'T SURE OF THE NEIGHBORS SITUATION.

APPROXIMATELY SIX MONTHS LATER, WE WERE TOLD BY A NEIGHBORING LAND OWNER THAT THE BOUNDARIES HAD EXPANDED. WE CALLED THE COUNTY AGAIN AND WAS TOLD WE STILL WERE NOT INSIDE THE BOUNDARIES.

THE INFORMATION THE COUNTY GAVE US WAS BELIEVED SUBSTANTIATED BECAUSE WE ONLY TWICE RECEIVED ANY INFORMATION REGARDING BOUNDARY CHANGES NOR MEETING TIMES AND DATES.

BE ADVISED THAT WE ARE THE LAST PROPERTY ON THE BITTERWATER ELECTRIC LINE. OUR AQUIFER IS THE BITTERWATER AQUIFER. WE ARE NOT IN THE PASO ROBLES AQUIFER. IT IS MY UNDERSTANDING THAT SOMEONE ATTEMPTED TO DRILL A WELL JUST WEST OF US AND WAS UNABLE TO FIND WATER. WE'VE BEEN TOLD THAT WE MAY NOT EVEN BE IN THE BITTERWATER AQUIFER, BUT MAY BE ON OUR OWN SPRING. SEE THE ATTACHMENT INDICATING OUR PROPERTY BOUNDARIES, LOCATION OF THE WELL AND THE HOUSE COMPOUND. WE HAVE A SOLAR WELL NEARLY ONE MILE FROM THE WEST BOUNDARY. WE DO NOT PRODUCE ENOUGH WATER TO OPERATE AN IRRIGATED OPERATION. OUR WATER USAGE IS RESIDENTIAL ONLY AND I DO NOT SEE A FUTURE CHANGE.

WE WERE ALSO INFORMED THAT ANN MYHRE FILED FOR AN EXCLUSION FOR THE ENTIRE GILLIS CANYON PROPERTIES BEFORE AUGUST 28, 2015.

IN BREVITY, I STILL BELIEVE THAT WE ARE OUTSIDE OF YOUR BOUNDARIES. THE

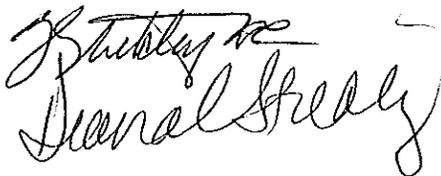

FACT THAT WE HAVE BEEN EXCLUDED FROM PARTICIPATION IN YOUR INFORMATION DURING THE ENTIRE PROCESS WOULD FURTHER INDICATE SUCH. THE FACT THAT THE COUNTY, TWICE, TOLD US WE WERE NOT INCLUDED SUBSTANTIATED EXCLUSION. AND, THE FACT THAT WE WERE INFORMED ONLY AFTER THE DUE DATE OF THE EXCLUSION REQUEST, BY A NEIGHBOR LAND OWNER, NOT BY YOU WOULD ALSO INDICATE WE ARE OUTSIDE THE BOUNDARIES.

WE RECEIVED FLIERS IN THE MAIL TWICE DURING THE PAST MANY MONTHS AND DID NOT RESPOND NOR ATTEND INDICATED MEETINGS BECAUSE WE HAD BEEN TOLD BY THE COUNTY THAT WE WERE OUTSIDE THE BOUNDARY. WE WERE NEVER INFORMED OF ANY DUE DATE TO ASK FOR AN EXCLUSION. THAT IS WHY WE ARE NOW RESPONDING WITH THE EXCLUSION REQUEST, JUST IN CASE IT APPLIES.

IF YOU REQUIRE MORE INFORMATION THAN IS ATTACHED, PLEASE CONTACT US BY PHONE OR MAIL AND WE WILL BE AS HAPPY TO COOPERATE WITH YOUR NEEDS AS I HOPE YOU ARE TO BE STRAIGHT FORWARD WITH US.

THANK YOU IN ADVANCE FOR YOUR ANTICIPATED COOPERATION. PLEASE LET US KNOW, ONE WAY OR THE OTHER, OF YOUR DECISION.

THE STICKLEYS.
