Our house at 1803 10th St in Los Osos. is in a dead zone 50% of the time for the vaunted Verizon Wireless. I can rarely receive texts or phone calls without turning my Samsung S4 OFF/ON, and then sometimes it's still a dead zone. Having said this, I don't believe Los Osos has enough towers/antennas. I'd copy Verizon Wireless, but they don't even have a customer service email address!

Anton

Hello Kerry,

Sorry to learn that you could not attend the LOCAC meeting tonight due to illness.

There was discussion regarding the proposed wireless antennas at 1330 Van Buerden Dr. I am in favor of the project. I live in Monarch Grove and for unknown reason my home is in a partial dead zone for cell service. I must maintain a land line to receive reverse 911 calls. For emergency services I cannot rely on cell service unless I am away from my home.

I feel the visual effect of the antennas is minimal and the environmental effect is negligible. The benefit outweighs those issues. Again I thank you for your community service.

Sincerely,  
Dianna McFarland
