

ATTACHMENT A

PRIOR TO ANY CONNECTION TO THE APPROVED WASTEWATER PROJECT, the Permittee shall submit two copies of a Septic System Decommissioning Plan to the Executive Director for review and approval. The Septic System Decommissioning Plan shall clearly identify all measures to be taken to appropriately decommission existing septic tank systems and to connect such users to the approved project. The Plan shall provide a process for evaluating septic systems for possible on-site reuse, including for on-site filtration and percolation of stormwater to the degree feasible and appropriate, and a process for implementing such conversion or for implementing appropriate abandonment measures depending on which measure property owners choose. The Permittee shall undertake development in accordance with the approved Septic System Decommissioning Plan.
