Subject: New AT&T Tower in Los Osos

Paul,

I am local business owner and resident of Los Osos. I am very excited to hear that there will be a new AT&T cell tower constructed by the VanBeurden offices here in Los Osos. Our cell reception service over the past 4 years has been below average and hard to receive in many areas of Los Osos. My family and my business associates are in full support of this new construction! If there is a vote that is taking place on this, I would encourage you to vote YES!

We look forward to this project being approved and having better reception in this area!

Thank you,
Mike-

Subject: Proposed Cell Site in Los Osos by at&t

Dear Mr. Sittig,

I have been in the telecommunications field for over 35 years, and a resident of Los Osos for over 30 years. I want to voice my support for the new proposed cell site for at&t in the Los Osos area, on the Van Beurden property. I feel it would greatly increase the coverage in our area and would be an important asset for emergency communications. The county and at&t has my 100% support on this issue.

Sincerely,

Dan Cuvelier

Paul u need to explain to joe public that if we have great cell service in Los Osos they can save money by cutting their land line. That's n average saving of \$50.00 per household. During these tough economic times I think joe public will understand this time around

Paul -

I am a resident of Los Osos, CA and would like to express my YES vote for the proposed cell site at 1320 Van Beurden, LOVR....

This area is notoriously bad with ATT internet and cell service any help we can get is GREATLY appreciated.

Thank you,
Mary Kelting

Subject: Support for Cell Site in Los Osos

We fully support the addition of a cell site in Los Osos on Van Beurden Drive. Cell phone reception here is weak. A small minority of vociferous people in this community have stopped the addition of cell phone support with totally bogus arguments about health issues. There is no science to support their claims. Please add our voices to your list of supporters.
